PROFILE

Cybersecurity MSc student with a software-engineering foundation and a year as a network engineer running enterprise routing, firewalls, and SLA-bound uptime. My master's thesis builds a LockBit threat-intelligence knowledge graph that drives LLM-generated adversary emulation plans. I'm moving toward governance, risk, and compliance - pairing real technical grounding with how organizations manage and assure security.

EXPERIENCE

Junior Network Engineer — Triangle Services Ltd, Bangladesh

May 2023 - Apr 2024

- Installed, configured, and upgraded high-capacity enterprise routers, switches, and firewalls.
- Monitored network health, traffic flow, and uptime to keep customer SLAs consistently met.
- Troubleshoot and resolved incidents, and supported network security and defense.

Teaching Assistant — AIUB - Dept. of Computer Science

Nov 2022 - Apr 2023

- Prepared and organized course materials to support the lecturer.
- Assisted in administering short in-class quizzes and examinations.
- Helped students by answering common questions and clarifying concepts.

Bicycle Mechanic — Bellahøj Cykler, Copenhagen

- Bicycle repair and assembly, plus webshop and social-media management, branding, and customer service.

Event Crew — KROWN KREW, Copenhagen

- Stage, AV, lighting, and sound setup; truck loading and warehouse logistics under tight deadlines.

EDUCATION

MSc Cybersecurity — Aalborg University, Copenhagen

2024 - Present

Thesis: *Adversary Plan Generation with Knowledge Graphs and LLMs* — a LockBit-focused CTI knowledge graph (Neo4j) used as ground truth for a GraphRAG + LLM pipeline that generates Adversary Emulation Plans.

BSc Software Engineering — American International University-Bangladesh (AIUB)

2018 - 2022

CERTIFICATIONS & LEARNING

In progress: Google Cybersecurity Professional Certificate; TryHackMe learning path

Planned: CompTIA Security+, AWS Cloud Practitioner, Microsoft Azure Fundamentals (AZ-900), ISACA CRISC, ISC2 AI Security

Completed: Claude 101 and Claude Code 101 (AI literacy)

SKILLS

Security & GRC: Threat intelligence, adversary emulation, risk & controls; focus areas: ISO/IEC 27001, NIST CSF

Technical: Enterprise networking (routers, switches, firewalls, SLAs), Neo4j, GraphRAG/LLMs, Python, JavaScript, C#

Tools: Microsoft Office, IT troubleshooting

Languages: English (professional), Bengali (native)

ACTIVITIES & INTERESTS

AIUB Computer Club member • Volunteer, HYROX Copenhagen • Photography (Instagram: [@afridimozumder](https://www.instagram.com/afridimozumder)) • Travel across 5+ countries
